

### WHAT IS THE INNOVATION CENTER?

The Sycomp Technology Innovation Center is located in Foster City, CA. It is a state-of-the-art facility that showcases the full range of IBM-based technologies and solutions. Sycomp's investment in the Innovation Center keeps us at the forefront of emerging technologies and reflects our strong commitment to providing our clients with the best available solutions.

### WHAT CAN THE INNOVATION CENTER DO FOR OUR CLIENTS?

In the Innovation Center, clients have the unique opportunity to see Sycomp solutions in action, and work side-by-side with the highly skilled, IBM-certified Sycomp team to develop, test, and validate best-in-breed solutions. Within the Innovation Center, client-specific production environments can be replicated to demonstrate proposed solutions, providing clients with hands-on experience without the risks associated with introducing a new solution into an existing IT environment.

### WHAT CAN THE INNOVATION CENTER DO FOR IBM?

IBM will have open access to this center as an extension of the IBM team, able to demonstrate such solutions as Server Virtualization, Backup & Recovery, Storage Management, Security Solutions, and Clustering Solutions.

*"The Sycomp Technology Innovation Center brings together complete solutions for SMB that helps Sycomp deliver value to their clients. Sycomp can now demonstrate its solutions and services in conjunction with the IBM products and technologies, giving clients a one-stop-shop for all their business needs."*

Neal Callahan  
VP, Systems and Technology Group  
IBM Western Region Sales
